DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 8 is rejected under 35 U.S.C. 102(e) as being anticipated by Malchesky. Malchesky discloses an irrigating medium comprising an electro-chemically activated, aqueous saline solution which includes both an aqueous predominantly anion-containing solution and a separate aqueous predominantly cation-containing solution having microcidal as well as dispersing and surfactant properties (column 2 lines 10-18). It has been held that a recitation with respect to the manner in which a claimed product is intended to be employed, i.e. "for irrigating root canals", does not differentiate the claimed product from a prior art product satisfying the claimed limitations. The process and intermediate products used in the process by which the medium is made, i.e. "it is electrochemically activated in an electro-chemical reactor . . . ", are not given patentable weight, because a product claim is properly met if the final product is shown regardless of the process used.

Allowable Subject Matter

3. Claims 3-7, 9, and 10 are allowed.

Response to Arguments

4. Applicant's arguments filed April 8, 2003 have been fully considered but they are not persuasive. The prior art shows the claimed limitations of claim 8. The intended use of the product is not given patentable weight and the process by which the product is made is not given patentable weight. See paragraph 2.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
